

Sony Ericsson Z500a Keypad Replacement

Written By: Jory Benitez

INTRODUCTION

This guide shows how to remove the phone keypad.

TOOLS:

- [T6 Torx Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Keypad

- Remove back cover and battery.

Step 2

- Using a T6 precision screwdriver, remove the 4 screws.
- Flip open the phone and keep the back cover facing you.

Step 3

- With the phone open, take the plastic opening tool and run it between the phone case and phone body to loosen the key pad.
- Note: There are two clamps that lock it to the phone case (one on each side).

Step 4

- Flip the phone over and lift straight up on the key pad to remove it.

 Be sure to hold the phone flat (parallel to the table) because there are loose parts that may fall out.

To reassemble your device, follow these instructions in reverse order.
